EDUCATION

Kongu Engineering College , Erode, Tamil Nadu B.Tech, Information Technology CGPA: 7.73	2023 – 2027
KGMHSS , Erode Higher Secondary, Computer Science Percentage: 93.167%	2021 – 2023
SVMS , Erode Secondary Education Percentage: 93.167%	2016 – 2021

PROFESSIONAL EXPERIENCE

IT Penetration Testing Team — Kongu Engineering College <i>Penetration Tester / Security Researcher</i>	Erode, Tamil Nadu <i>Authorized Internal Security Testing</i>
- Helped establish the IT Penetration Testing Team responsible for authorized security testing of college infrastructure. - Identified and reported 9+ critical vulnerabilities across in-scope systems, including findings rated up to CVSS 9.8. - Conducted reconnaissance, service enumeration, vulnerability assessment, and security validation using Nmap, Nuclei, Nikto, and Linux security utilities. - Communicated identified vulnerabilities to the responsible IT and development teams and documented each finding. - Assisted the organization in patching and remediating reported vulnerabilities, and validated fixes through follow-up testing where applicable.	

PROJECTS

Aadhiran Kids Collections — E-Commerce Platform	www.aadhirankidscollections.com
- Developed and deployed a full-stack MERN e-commerce web application for a retail business, live and publicly accessible in production. - Implemented the application end to end across the database, server, and client layers. <i>Tech Stack</i>: MongoDB, Express.js, React, Node.js	
Aadhiran Kids Collections — Billing & Inventory System	Desktop Application
- Developed a desktop billing application for the same retail business to support day-to-day store operations. - Implemented billing and inventory management functionality as practical, in-use business software.	
Wazuh Home Server — Blue Team Monitoring Lab	Self-Hosted
- Deployed Wazuh on a self-hosted home server for centralized security monitoring and log collection across connected hosts. - Configured the environment for blue-team training, alert triage, and hands-on security monitoring practice. <i>Tools</i>: Wazuh Manager, Wazuh Indexer, Elasticsearch	
Home Server Architecture & File Sharing	Infrastructure
- Built and configured a self-hosted home server environment for infrastructure management and file sharing. - Configured hosting capabilities within the environment and handled ongoing server administration.	
CTF Analysis & Cybersecurity Learning Platform	Under Development
Developing a platform for analyzing CTF challenges and their solving techniques to support structured cybersecurity learning.	

TECHNICAL SKILLS & TOOLS

Cybersecurity	Penetration Testing, Vulnerability Assessment, Web Vulnerability Scanning, Reconnaissance, Service Enumeration, Privilege Escalation, Threat Intelligence, Security Monitoring, Blue Team Fundamentals
Security Tools	Nmap, Nuclei, Nikto, Wazuh (Manager, Indexer), SSH, Linux Security Utilities
Programming	Python, Bash, Java
Web / Dev	MERN Stack — MongoDB, Express.js, React, Node.js
Systems	Linux Administration, Git, GitHub, Docker, AWS (EC2, S3), Home Server / Self-Hosting

CERTIFICATIONS

- AWS Certified Cloud Practitioner** — Amazon Web Services
- Oracle Java SE 17 Developer** — Oracle
- Introduction to the Threat Landscape** — Fortinet
- SOC Member** — LetsDefend
